

## **New Facility Positions AT Conference for Future Growth in Conferencing Services Industry**

**Strategic Location Fits with Long Term Strategy of New York-based Conference Call Services Provider.**

**NEW YORK, January 7, 2010** - AT Conference today announced the finalization of a collocation license agreement with Markley Group for services at One Summer Street in Boston, MA. This agreement provides AT Conference with a new state-of-the-art collocation data facility to house their recently purchased Compunetix CONTEXT Summit media processor as well as a build-out of a data farm.

As an addition to AT Conference's existing collocation facility at 55 Marietta Street in Atlanta, GA this expansion will support AT Conference's long term growth plans as well as provide additional redundant disaster recovery support if needed.

The facility at One Summer Street was selected in part for its unmatched strategic location serving as an intersection of all major fiber loops in the Boston area. Home to more than 40 domestic and international carriers, One Summer Street is considered the most significant data center/telecommunications facility in the entire New England area.

AT Conference's CEO, David Jannetti, sees this addition as a key step in strengthening the company's position as an industry leader. "The new collocation facility is an important piece of our long term strategy to support our growth in the next five years and beyond," Jannetti said. "Our selection of One Summer Street ensures that we have the best available in regards to site security, serviceability, environmental controls, and diverseness in connectivity options to best service our customers."

### **About AT Conference**

AT Conference is a leading provider of conference call and web conferencing services that help businesses communicate more efficiently. The company is primarily focused on the SMB market and has over 75,000 users worldwide.

Headquartered in Southampton, New York, AT Conference also has operations in California, Florida, Georgia, Massachusetts and Nevada.
